1889

1931

In 1889, forty-two years ago this month, INDIA RUBBER WORLD published its first issue.

The expansion and the developments in the industry during this period have been greater than even the most imaginative could forecast.

Through all this time INDIA RUBBER WORLD has authoritatively recorded these changes — resulting in a collection of a great amount of data on all branches of the trade in every country where rubber is produced, manufactured, or used.

We look back with pride on our many years of service and hope we may continue for decade after decade to enjoy the confidence and esteem of the vast industry of which INDIA RUBBER WORLD is the spokesman and servant.

The oldest—the largest—the most influential! Even as now, may that ever be the status of INDIA RUBBER WORLD — and solely and always as a reward of merit.
